- Insert Court Case Number
- Check this box with X to have the Caption will reflect the State's participation in the case.
- Insert the parent's names into the boxes marked Petitioner and Respondent. Until such time as you define their roles as either Petitioner or Respondent, the worksheet will call them Parent A and Parent B in the Caption and in the column headings. Once you define the roles of Mother and Father as Petitioner or Respondent, the caption and headings will change. Use Parent A and Parent B for same sex couples.
- Insert the names of the children and their dates of birth. Let the calculator figure out the age. If you only insert an age without the date of birth, the calculator will not estimate the presumptive termination date. If the estimated grade for the youngest child is incorrect, override it using the **green box** and the presumptive termination date will recalculate

This box overrides the date on the top of the worksheet.

To do a calculation for a prior time period with a different Minimum Wage (MW) or a calculation for a person living in another jurisdiction with a different MW, insert the hourly MW here. That will adjust the SSR at the bottom of the worksheet to an amount that is 80% of full time MW at the hourly rate you enter.

The default MW rate will appear here.

- From March of 2018 until November 31, 2018, the SSR will be based on a MW of \$10.50 by default.
- From December 1, until November 31, 2019, the SSR will be based on a MW of \$11.00 by default.
- From December 1, until November 31, 2020, the SSR will be based on a MW of \$12.00 by default.

By 2020, there should be new Guidelines.

This box will add language under the name of the Respondent which defines a prior period being calculated.

Use the ESC key to get rid of any pop-up instruction box.
