The following CAAL codes have been created to assist you in working the eight Quality Initiatives Ad Hoc Reports. One CAAL code was created for each report and should be used in conjunction with QR002 (Ad Hoc Quality Review-without changes).

When your review of a case is complete and you determine that no changes were necessary (the case was correct), you will enter QR002 with the corresponding CAAL code listed below. The CAAL code below will prevent the case from appearing on a future report. DO NOT use one of the codes listed below if you are unable to resolve the issue. If a case is incorrect, it must be corrected. The codes below are to be used only if the case is correct.

The following is a listing of the eight (8) new CAAL codes now in production along with the corresponding ad hoc report:
