The State Central Registry will open a separate case suffix when a transmittal is received stating that there is a different support order for each child with the same CP and NCP. This will include the following scenarios:

- A. Two orders - one for each child, same CP and NCP, different monthly child support amount ordered for each child.
- B. Two orders – one for each child, same CP and NCP, the CP is ordered to provide medical coverage for one child and the NCP is ordered to provide medical coverage for the other child.
- C. Two orders – one for each child, same CP and NCP, child support orders are from different states and with different monthly amounts.
